

UTAH

PLANIMETRIC MAPS

141 Planimetric maps constructed by photogrammetric methods, available in 15' quadrangles, at 1" = 1 mile, or 2" = 1 mile.

NOTE: All planimetric maps shown have been constructed or compiled since 1936. None have been field checked.

Some of these quadrangles are not complete, but are useful for most purposes.

Missing quadrangle numbers indicate no coverage.

NOTES TO PURCHASERS

1. Orders will be filled as expeditiously as possible, but regular Soil Conservation Service needs will be accorded priority.

2. These planimetric maps are available in quadrangles covering 15 minutes of latitude and longitude. When ordering list each quadrangle by state and number, thus: Utah 181 or New Mexico 172, etc.

3. All orders for these maps should be accompanied by check, money order or draft, in the exact amount of the order, made payable to "The Treasurer of the United States."

Soil Conservation Service, USDA

4. Reproductions are available at a cost of 75c per sheet with a minimum order of $1.00.

5. Please address your requests to:
