Foreword

The Federal Information Processing Standards Publication Series of the National Institute of Standards and Technology (NIST) is the official publication relating to standards and guidelines adopted and promulgated under the provisions of Section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100-235. These mandates have given the Secretary of Commerce and NIST important responsibilities for improving the utilization and management of computer and related telecommunications systems in the Federal Government. The NIST through its National Computer Systems Laboratory provides leadership, technical guidance, and coordination of Government efforts in the development of standards and guidelines in these areas.

Comments concerning Federal Information Processing Standards Publications are welcomed and should be addressed to the Director, National Computer Systems Laboratory, National Institute of Standards and Technology, Gaithersburg, MD 20899.

Announcing the Standard for

**COUNTIES AND EQUIVALENT ENTITIES
OF THE UNITED STATES, ITS POSSESSIONS,
AND ASSOCIATED AREAS**

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology (NIST) after approval by the Secretary of Commerce pursuant to Section 111 (d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Public Law 100-235.

1. Name of Standard. Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas.

2. Category of Standard. Federal General Data Standard, Representations and Codes.

3. Explanation.

a. Federal Information Processing Standard (FIPS) 6-4 provides the names and codes that represent the counties and other entities treated as equivalent legal and/or statistical subdivisions of the 50 States, the District of Columbia, and the possessions and freely associated areas of the United States. Counties are considered to be the "first-order subdivisions" of each State and statistically equivalent entity, regardless of their local designations (county, parish, borough, etc.). Thus, the following entities are considered to be equivalent to counties for legal and/or statistical purposes: The parishes of Louisiana; the boroughs and census areas of Alaska; the District of Columbia; the independent cities of Maryland, Missouri, Nevada, and Virginia; that part of Yellowstone National Park in Montana; and various entities in the possessions and associated areas.

b. FIPS 6-4 contains minor editorial changes from the text of FIPS 6-3. It also incorporates technical changes that the NIST issued as Change Notices to FIPS 6-3. FIPS 6-4 supersedes FIPS 6-3 in its entirety.

4. Approving Authority. The Secretary of Commerce.

5. Maintenance Agency. U.S. Department of Commerce, Bureau of the Census, Geography Division.

Questions concerning the list of entities and their assigned codes are to be addressed to the Maintenance Agency: Office of the Chief, Geography Division, Bureau of the Census, Washington, DC 20233. Users of this standard who need to be notified of changes that occur prior to the next publication of the standard must complete the Change Request Form provided in this publication and send it to: Standards Processing Coordinator (ADP), National Computer Systems Laboratory, National Institute of Standards and Technology, Gaithersburg, MD 20899. The NIST will issue Change Notices on an as-needed basis.

7. Objectives. The objectives of this standard are to improve the utilization of data resources of the Federal Government and to avoid unnecessary duplication and incompatibilities in the collection, processing, and dissemination of data.

8. Applicability. This standard is prescribed for the collection, processing, and interchange of coded data by Federal agencies, and whenever requirements for such data are imposed by a Federal agency on industry, State or local governments, or the public. Use within agency data systems is encouraged when such use contributes to operational benefits, efficiency, and/or economy.

9. Specifications. Federal Information Processing Standard 6-4 (FIPS 6-4), Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas, 1990 August 31 (affixed).

10. Implementation Schedule. This standard became effective on 1990 August 31. Federal agencies, based on their specific operational requirements, are to develop procedures for implementing this standard by their operating units and personnel.

11. Where to Obtain Copies of the Standard.

- a. Copies of this publication are for sale by the National Technical Information Service (NTIS), U.S. Department of Commerce, Springfield, VA 22161; write to or call the NTIS Computer Products Office (703/487-4650) for cost and ordering information. Federal Information Processing Standard 6-4

1990 August 31

Specifications for

COUNTIES AND EQUIVALENT ENTITIES OF THE UNITED STATES, ITS POSSESSIONS, AND ASSOCIATED AREAS

1. Name of Standard. Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas.

2. Category of Standard. Federal General Data Standard, Representations and Codes.

3. Explanation. This standard provides the names and codes that represent the counties and other entities treated as the equivalents of counties for legal and/or statistical purposes in the 50 States, the District of Columbia, and the possessions (American Samoa, Guam, Northern Mariana Islands, Palau, Puerto Rico, and Virgin Islands of the United States) and freely associated areas (Federated States of Micronesia and Marshall Islands) of the United States. Palau is the last remaining component of the Trust Territory of the Pacific Islands (TTPI); for presentation purposes, Palau, rather than the TTPI, is treated as the State-equivalent entity.

The term "counties" refers to the "first-order subdivisions" of each State and statistically equivalent entity, regardless of the local terminology (county, parish, borough, etc.). First-order subdivisions of the States include the parishes of Louisiana; the boroughs and census areas of Alaska; the independent cities of Maryland, Missouri, Nevada, and Virginia; and the portion of Yellowstone National Park in Montana. In the possessions, entities regarded as first-order subdivisions are as follows: American Samoa: districts and islands (the areas legally designated as "counties" in American Samoa are second-order subdivisions); Northern Mariana Islands: municipalities; Palau: states; Puerto Rico: municipios; Virgin Islands: islands (comprising the three major islands). The District of Columbia and Guam have no first-order subdivisions, and therefore these same areas serve as the first-order subdivisions. First-order subdivisions of Federated States of Micronesia are states; of Marshall Islands, municipalities.

4. Specifications. The succeeding pages of this standard provide a list, by State, of the names and codes of the counties and equivalent entities. The States and the District of Columbia are listed in alphabetical sequence; the possessions are listed alphabetically in Appendix A, and the associated areas in Appendix B. Within each State and statistically equivalent entity, the counties or equivalent entities are listed in alphabetical sequence except for independent cities, which comprise a separate alphabetical and numeric (code) sequence following the list of counties in their respective States. This list of first-order subdivisions provides complete coverage of the United States and its possessions and associated areas.

5. Qualifications. County codes are assigned uniquely within each State and equivalent entity. In other words, counties in different States will have the same code; for example, code 001 is assigned to both Autauga County, Alabama and Apache County, Arizona. Accordingly, in data systems concerned with the identification of counties in more than one State, the county code must

be used in conjunction with Federal Information Processing Standard 5, *Codes for the Identification of the States, the District of Columbia and the Outlying Areas of the United States, and Associated Areas*. Autauga County, Alabama would be represented as AL001 and Apache County, Arizona would be represented as AZ001 when the State alphabetic codes are used; and as 01001 and 04001, respectively, when the State numeric codes are used. The form of representation (State alphabetic or numeric code) is to be identified in format descriptions for those data systems that use the representations described in this standard.

6. Special Information.

- a. Changes in this revision of the standard are noted by a dagger symbol following the county code if the code is new, or the county name if it is different from that reported in FIPS PUB 6-3. All new and deleted areas are explained by footnotes. Minor name revisions are not explained.
- b. This standard does not apply to the codes established by the U.S. Department of Agriculture to meet the unique program requirements of Public Law 85-278 (71 Stat. 601) and the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590H). For information on these requirements and the associated codes, contact the Office of Operations, U.S. Department of Agriculture, Washington, DC 20250.

The legally defined first-order subdivisions of Alaska are called boroughs. The portion of Alaska that is not within organized boroughs is covered by a single "unorganized borough," a legal entity administered by the State government. Because the unorganized borough is too large geographically to provide a suitable basis for data analysis, the State of Alaska and the Bureau of the Census have divided it into "census areas" for statistical purposes. The census areas are identified in the list by "(CA)" following the name. Data systems that use the unorganized borough may code it as 999. Changes since FIPS PUB 6-3: Aleutian Islands (CA) (010) was replaced by Aleutians East (1987 October 23) and Aleutians West (CA) (1990 January 1); Kobuk (CA) (140) was replaced by Northwest Arctic (1986 June 2); Lake and Peninsula was established from part of Dillingham (CA) (1989 April 24). (The relationships are approximate.)

New Census Borough in Alaska

Denali Borough was established as a new borough in Alaska on December 28, 1990.

The borough removes territory primarily from the Yukon-Koyukuk Census Area, and a small portion of the Southeast Fairbanks Census Area; the western boundary of the latter is revised to coincide with the legal boundary of the Denali Borough.

A census map delineating census areas and boroughs is attached. The following is a complete list of all current Alaska county equivalents (B) identifies a borough; (C) identifies a census area:

A map identifying the current boroughs and census areas is attached. The following is a complete list of all current Alaska county equivalents (B) identifies a borough; (C) identifies a census area:
